

🎓 EDUCATION

Amrita Vishwa Vidyapeetham University

Master of Technology in Artificial Intelligence

2022.09-2024.07

- CGPA: 7.59/10 (First Class)
- Thesis: Advanced Predictive Maintenance of Phoenix Contact Relays 🔗
- Focused on digital twin-based predictive maintenance using machine learning to reduce industrial downtime.

Dharmsinh Desai University

Bachelor of Technology in Computer Engineering

2018.07-2022.05

- CGPA: 7.57/10 (First Class with Distinction)
- Relevant Coursework: Data Structures, Operating Systems, Database Management Systems, Artificial Intelligence

🏢 WORK EXPERIENCE

Pathway Infotech (OPC) Private Limited

Rajasthan, India

Development Engineer — Duck Creek Developer

2025.02-Present

- Developing and maintaining insurance policy components using Duck Creek Technologies.
- Resolved maintenance and configuration tickets for policy workflows and forms.
- Built an internal tool to automate XPath identification, field mapping, and LOB form analysis for QA/BA/DEV teams.

ABB

Bangalore, Karnataka, India

Research Intern

2023.08-2024.07

- Thesis: UQ4Pro: A Demonstration Tool for Uncertainty Quantification in Process Industry Applications 🔗
- Designed a continuous retraining pipeline for ML models adaptable to classification, regression, and time series forecasting tasks.
- Built an extensible and modular codebase to support fault prediction using benchmark industrial datasets.
- Integrated MLOps practices using ZenML for CI/CD and Streamlit for a web-based visualization interface.
- Implemented conformal prediction techniques to quantify the uncertainty of the model in fault classification pipelines.
- Collaborated with a cross-disciplinary R&D team to align the deployment of the model with industrial process safety standards.

BISAG-N

Gandhinagar, Gujarat, India

Intern

2021.12-2022.04

- Developed an interactive dashboard using Dash (Plotly) for real-time stock price prediction.
- Built and evaluated ML models (Linear Regression, LSTM) for time series forecasting of financial data.
- Applied data preprocessing techniques such as normalization and windowing to improve prediction accuracy.

💻 PROJECTS

- **Neural Style Transfer:** Created a computer vision technique that blends a content image and a style reference image, simulating "painted" output while retaining core elements of the original.
- **Search Algorithms for Maze Solving:** Implemented depth-first search, breadth-first search, A*, stochastic A*, Dijkstra, and random-walk algorithms to solve mazes in minimum steps.
- **N-Puzzle Problem Solver:** Built an efficient solution using the A* algorithm to solve the N-Puzzle problem in minimal steps.

✂ SKILLS

- **Languages:** Python, C++, Java
- **Frameworks & Tools:** TensorFlow, scikit-learn, Streamlit, Flask, Django, Dash
- **MLOps & Data:** ZenML, MySQL, Pandas, NumPy, Matplotlib
- **Concepts:** Deep Learning, Machine Learning, Data Structures & Algorithm

⚙ CERTIFICATE

- **NPTEL:** Natural Language Processing [🔗](#), Deep Learning for Computer Vision [🔗](#)
- **Coursera:** Databases and SQL for Data Science [🔗](#), Python for Data Science [🔗](#), Python for AI & Development [🔗](#)
